Huawei E5530

Connect to the configuration interface of the Mobile Router.

1. A pop-up notification will appear automatically prompting opening of a default browser window with the configuration interface.
2. If it does not happen automatically, the configuration interface can always be reached by typing: 192.168.8.1 into the address bar of a browser.
3. Enter the default username and password. Both of them are: admin
4. Click on the left button (Accept) as seen in the picture above.
5. Change the language to English. The browser window will automatically refresh the page and the device will change the language.

Huawei E5530

SET UP MANUAL APN SETTINGS

Connect to the configuration interface of the Mobile Router.

6 Click on “Settings”

7 Click on “Dial-up”

8 Click on “Profile Management”

9 Put in the APN settings for your specific provider (in this case giffgaff APN settings are shown just for an example).

10 Click on “Save”
