APP SETTINGS GUIDE

Connect to the configuration interface of the Mobile Router. A pop-up notification will appear automatically prompting opening of a default browser window with the configuration interface. If this does not happen automatically, the configuration interface can always be reached by typing: 192.168.0.1 into the address bar of a browser.

1. Login with the credentials: Username: **admin** Password: **admin**

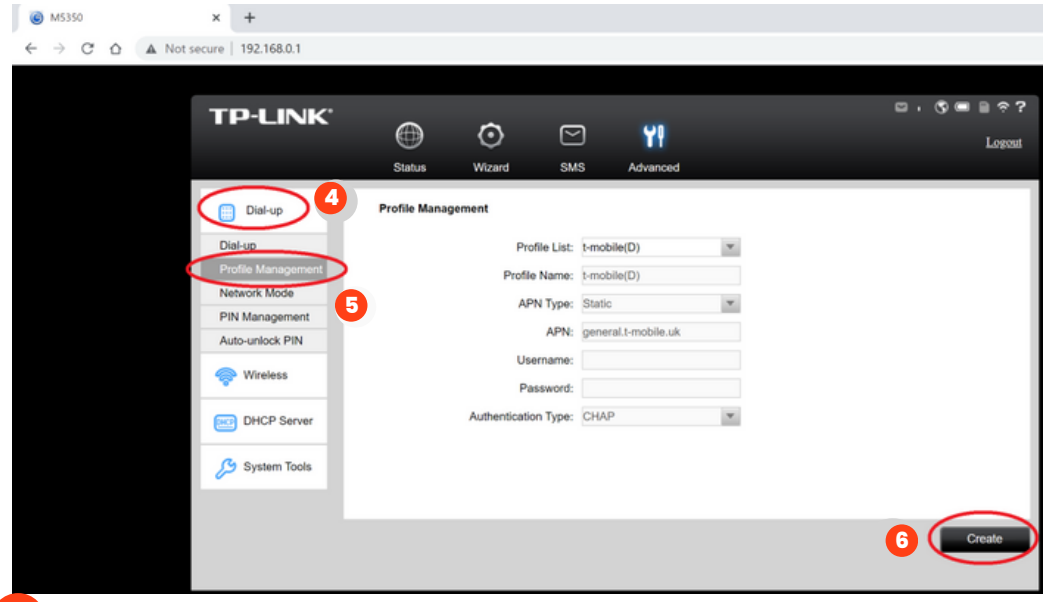

2. Click on: **Login**

3. When the Home screen of the interface loads click on Advanced
